Rob:
The attached figure was presented at the Nov RAB – we will be updating it for the April 1 RAB. This should get you what you need for now.

Regards,

Brian

Subject: RE :Navy Bethpage vertical profile borings and monitoring well locations

Hello Brian,
I hope you are as ready for Spring as I am. I should be able to get out to Bethpage next week, and would like to visit the Navy rigs. Northrop-Grumman has also agreed to have me visit their rigs and I'll try to plan a day at all locations.

I'm playing catch up. I spent a lot of time trying to go through my files, but cannot locate a simple map that shows the locations of all the VPBs to date and the ones scheduled. I'm not sure if anyone has put together an up to date map that shows the VPBs and the associated monitoring wells installed. Any suggestions?
